

A1
Cont
6. (Amended) The anisotropic scattering film according to Claim 1, obtainable by polymerizing a polymerizable substance filled in the micro pores.

7. (Amended) The anisotropic scattering film according to Claim 1, wherein the substance in the micro pores is an anisotropic substance.

A2
10. (Amended) The anisotropic scattering film according to Claim 7, wherein the anisotropic substance is a liquid crystal.

A3
12. (Amended) A liquid crystal display comprising a liquid crystal panel having a polarizing plate at least on the front surface side, the anisotropic scattering film described in Claim 1, a light guide, and a reflection plate or a diffuse reflection plate piled in this order, wherein the transmission axis of said liquid crystal panel and the transmission axis of said anisotropic scattering film are approximately parallel.
